## Article 1

In the 4Days Marches, one of three different distances is to be walked every day: 30, 40 or 50km\*. The following classification is made according to age and gender. Upon choosing the category, the corresponding distance will be binding for every walking day, i.e. it is not allowed to increase or reduce the distance corresponding to the chosen category for one or even several days.

#### R = Regulation distance

This is the minimum distance that must be completed successfully on each of the four days. The minimum distance depends on age and gender.

#### E = Extended distance

This is the regulation distance, plus an (optional) distance of 10 or 20km, on each of the four days.

\* The actual distance to be walked on each day may differ from the standard distance indicated here to the nearest kilometre.

# Article 2

The distance that a participant must walk depends on the year they were born and their gender.
